

CLAIMS

I claim:

- 1 1. A concrete coloring tool, comprising:
2 an enclosed frame having raised edges;
3 a flat, uniform perforated material enclosed inside of said
4 frame; and
5 a handle attached to one of the edges of said frame.
- 1 2. The concrete coloring tool according to claim 1,
2 wherein said frame is constructed of aluminum.
- 1 3. The concrete coloring tool according to claim 1,
2 further comprising a T-bracket having a mounting plate attached
3 to one of the edges of said frame and a socket pivotally mounted
4 to the mounting plate, said handle being mounted in the socket,
5 the T-bracket further having means for temporarily fixing the
6 socket at an angular inclination to the mounting bracket in
7 order to adjust an angular height of said handle.
- 1 4. The concrete coloring tool according to claim 1,
2 wherein said perforated material is constructed of uniformly
3 perforated steel sheet metal.

1

2

5. The concrete coloring tool according to claim 1,

3

wherein:

4

said frame is square in shape; and

5

said mesh screen is constructed of uniformly perforated

6

steel sheet metal.

1

6. The concrete coloring tool according to claim 1,

2

wherein said handle is hollow.

1

7. The concrete coloring tool according to claim 1,

2

further comprising an aluminum pole threaded into said handle.
